Peimar, Italian excellence serving renewable
energy worldwide

Italian quality

Passion Becomes Energy

Energy, innovation and sustainability

An Italian **gigafactory** on a global scale

Over the years, the company has strengthened its industrial role, developing in-house production of photovoltaic modules, now carried out across multiple manufacturing sites.

Over
1.5 GW
Production capacity

2+
Production sites

2007
The beginnings

Peimar is founded following an entrepreneurial initiative by Marco Casale in the photovoltaic sector.

2011
First step abroad

Opening of the first subsidiary in the United States, marking the start of international expansion.

2017
Italian production

Opening of the production facility in Brescia, Italy. Initial capacity: 150 MW.

Continuously evolving production

Our production has **evolved over time**, keeping pace with advancements in photovoltaic technology. This path of continuous growth demonstrates Peimar's ability to innovate and adapt to the needs of a constantly evolving market, while always maintaining the same objective: **to deliver superior-quality, durable and cutting-edge products.**

Photovoltaic solutions designed to last

Peimar's offering starts with **photovoltaic modules** and extends to energy management solutions, transforming energy generation into a complete and functional system. Inverters, energy storage systems and dedicated components make it possible to configure installations suitable for **residential, commercial and industrial applications**.

Alongside its products, Peimar develops an ecosystem of services that completes the offering. **Qualified technical support, remote monitoring tools and continuous assistance** support each project over time, from solution selection to system management.

2018

Expanded offering

Launch of Peimar-branded complete photovoltaic solutions.

2021

Global expansion

Peimar reaches a production capacity of 500 MW and operates 8 subsidiaries worldwide.

2025

Gigawatt scale

Expansion of a 1 GW production line in China and opening of the Chinese subsidiary.

2026

Production site upgrade

Renewal of the Italian production line.

**Italian quality,
energy for the world.**
